## **DETAILED ACTION**

### ***Response to Amendment***

1. This action is in response to the amendment mailed November 1, 2004. Claims 1 and 29 are amended and claims 39-51 are new. Examiner withdraws the previous rejections to further prosecute the claimed invention. Claims 1, 3-13, 28-30 and 32-51 are pending in this case.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1, 3-13 and 39-50 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of copending Application No. 10/477988. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications include a material useful as a substrate for an embossed flexible graphite sheet, the

Art Unit: 1774

material comprising a composite flexible graphite sheet comprising a plurality of zones of flexible graphite sheet., wherein: at least one of said plurality of zones has a characteristic different from at least one other of said plurality of zones. Although copending Application No. 10/477988 does not show that the material has a 5% difference in characteristic as in instant claim 1 or area weight as in claim 39, such percentage difference and area weight are inherent properties. The claiming of a new use, new function or unknown property which is inherently present in the prior art does not necessarily make the claim patentable. In re Best, 562 F.2d 1252, 1254, 195 USPQ 430, 433 (CCPA 1977).

4. Claims 28-30, 32-38 and 51 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The closest prior art does not teach or suggest the recited material further including a second material wherein said second material comprises one selected from a nonporous material or a formanious material or wherein at least one flexible graphite sheet of said plurality has a density that differs by more than 5% from the density of a second flexible graphite sheet of said plurality. The prior art does not teach motivation or suggestion for modification to make the invention as instantly claimed.

***Response to Arguments***

5. Rejection made under 102(b) as being anticipated by J. Shane et al (U.S. 3,404,061) has been withdrawn due to Applicant incorporating limitations from claim 2 into independent claim 1 and further amending claim 29. Rejection made under 103(a) as being unpatentable over J. Shane et al (U.S. 3,404,061) has been withdrawn due to Applicant incorporating limitations from claim 2 into independent claim 1.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
